

switch to windows 7 with zero capex

in recent years, have you postponed upgrading your pcs? are you reluctant to invest in modernising your pcs? well, you certainly are not alone.

a great number of businesses still work today with windows xp or vista, using pcs that often are already fully depreciated and most likely unsuitable to run the new "windows 7". and using outdated office software.

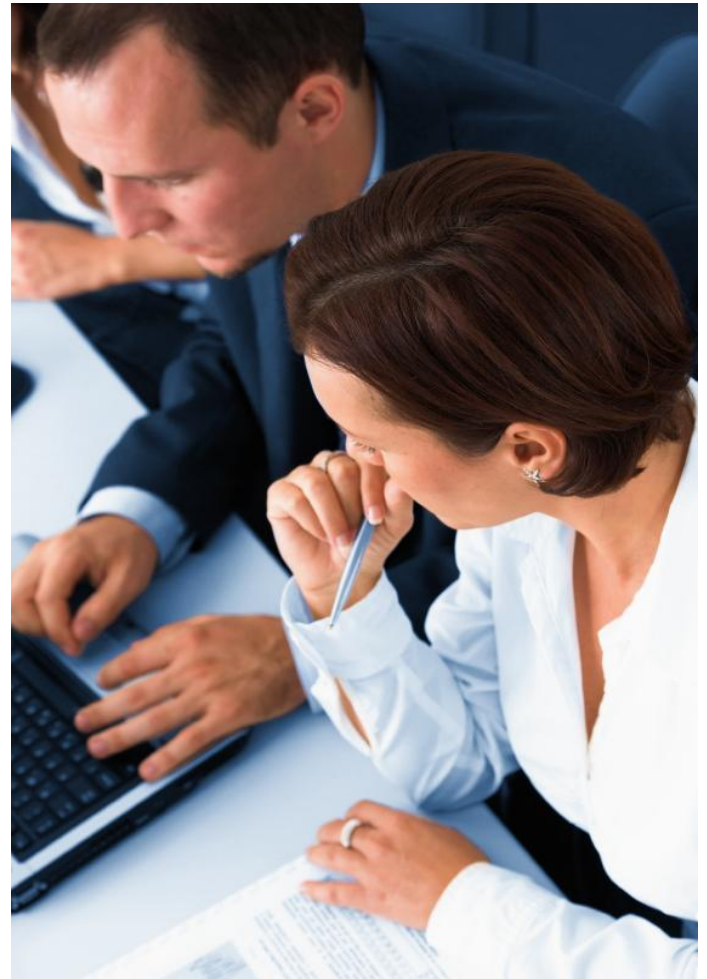

we offer you a possibility to modernise your office workplace at a fixed monthly fee per desktop. always the latest software versions, no need to purchase new pcs or software licenses, and no cost for ICT staff. safe, fast, and available anytime anywhere.

our system immediately lowers your ICT costs, you don't need to invest in your desktop environment anymore. you can re-use your existing pc hardware and laptops.

it allows you to immediately introduce teleworking, at home or on the road. with the same comfort as in the office. completely secure, no limitations, access to the same desktop, anywhere.

your personal desktop runs in our secured data centre, securely accessible anywhere, over the internet. flexible. effortless. carefree. safe. reliable. up-to-date.

the "pay as you go" formula rules out financial surprises. it offers unparalleled flexibility. desktops you no longer require can be returned. you only pay for what you use.

convince yourself

visit our website, or call us for an appointment. we will gladly demonstrate carefree desktop or provide you with a fully functional trial, with no obligation.

exite has been successfully realising ICT savings for customers for over a decade. now also for you.

with exite's "carefree desktop" your desktops run safely in our data centre. on the most modern computer systems, and with the latest software solutions.

no investment necessary. you don't need to purchase desktops, laptops and software licenses anymore. you can start directly, using your current desktop, laptop or thin-client.

we guarantee that you will always work with the latest versions of windows and office. all your data is stored centrally, where it is available to your employees. wherever they are. always, and 100% secure.

working from home or on the go was never this easy.

always more economical than doing it yourself!
